INNOVATION magnetic-clasp

Langer Jewellery Innovation – About Us

Noble materials, hand-made quality and the history of an innovation. Since 1968, Langer Schmuck has been standing for fine jewelry variations. Their own invention of the magnetic clasp is the icing on the cake.

The Langer team creates clasps made of fine materials like silver, gold and premium steel and integrates the clasp perfectly into the jewelry's design – which at last is a highlight in itself. With a variety of connections like integrated rings or rings on the outside, different bridges, etc. the products promise real, patented quality.

GET INSPIRED

Langer magnetic clasp – patented handcrafted quality „Made in Austria“. The trademark Langer® stands for high-quality craftsmanship with an ongoing and innovative product development. We are a family-run business putting a lot of passion into our work.

Our staff-family keeps an intense collaboration with our customers and suppliers. Thus, we are

creating desirable products with our own spirit – on top of a healthy working environment.

Langer produces the only waterproof magnetic clasp worldwide, mechanically sealed without any gluing. We offer fashionable clear and unique design with maximum magnetic force attraction.
